

Why your customer needs an HPC 1200CMB Blitz™ Code Machine

Cutting keys by code is what separates Security Professionals from Hardware Store key cutters. They need a machine that is fast, accurate easy to use, and dependable.

How to sell an HPC 1200CMB Blitz™ Code Machine

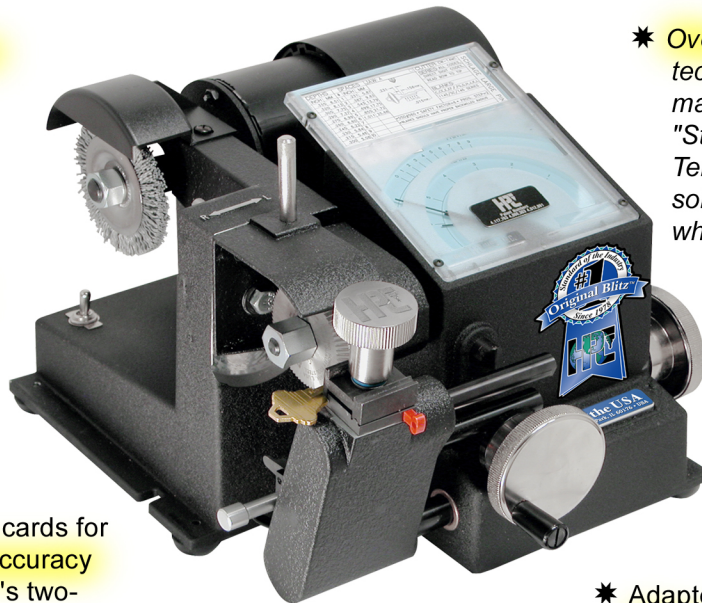

Key Selling Points:

- * **ACCURATE AND EASY TO USE!** HPC is known worldwide for their state-of-the-art code machines. The 1200CMB Blitz™ revolutionized code cutting when it was first introduced almost 30 years ago. No dials, no cams, no spacer blocks, no depth keys, no need to memorize measurements and increments. Count on "needle-point" accuracy by using single line code cards.
- * **CUT KEYS QUICKLY!** No machine is quicker to learn or faster to use. All it takes is swapping out a code card to switch between most manufacturers. No equipment adjustments needed.
- * **DEPENDABLE!** You can find HPC 1200CMB Blitz™ machines all around the world, in shops, in stores, and in vehicles. They get bounced around and worked out but never seem to wear out. In bitter cold or scorching heat, these machines continue to cut keys. Many of the original machines are still cutting keys after almost 30 years!

* More accurate gauging and cutting than competitor machines.

* Shoulder gauge stays in place for easy key gauging. The safety switch prevents cutting when the shoulder gauge up.

* Single-line code cards for "needle-point" accuracy (the competition's two-line cards leave room for slop between the lines, allowing for inaccurately cut keys).

No. 1200CMB
additional models available

* Over 25 years of proven technology & know-how have made HPC's Blitz™ the "Standard of the Industry." Tens of thousands have been sold by HPC, the majority of which are still in use today!

* Comes with 150 code cards. 30 more than competitor machines!

* Adapters available to cut Tubular and Tibbe Keys (an HPC Blitz™ exclusive).

* **FREE** software – \$595.⁰⁰ value (not included with competitor machines).
