

Standard Tubular Picks

Scan for more info!

HPC developed tubular picks that work on all of the pins at the same time. This has proven to be the **most efficient and effective method for defeating tubular locks**. With a few pumps in the lock, the feelers on HPC Tubular Picks move into position and **mimic the pattern of the original key**. You can then decode the feelers and cut a new key by code, duplicate a key directly from the pick, and of course, open the lock. **HPC offers 7 different models of tubular picks**, which can be separated into two groups, Standard and Specialty. The standard picks work on 7-pin standard size and pattern locks. The specialty picks work on variations of the 7-pin locks.

Standard 7-Pin

Standard 7-Pin
No. TLP-C

The original design of the **Standard 7-Pin** from more than 45 years ago, and still a favorite among locksmiths. Comes with the Tubular Key & Pick Decoder (No. TKPD-1) and a genuine leather case (No. TLP-CASE). (No. TLP-FEEL Feelers only).

7-Pin Standard

Model B

Model B
No. TLP-CMOD-B

Proper tension on the feelers is a critical aspect of defeating a variety of locks. The knurled collet of the **Model B** replaces the rubber band to allow for minute adjustments of tension on the feelers. Comes with the Tubular Key & Pick Decoder (No. TKPD-1) and a genuine leather case (No. TLP-CASE). (No. TLP-FEEL Feelers only).

7-Pin Standard

Quick Reset

Quick Reset
No. TLP-7SB

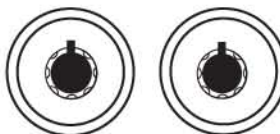

Standard Size
I.D.- .312" (7.92mm)
O.D.- .375" (9.53mm)

Small Bore
I.D.- .300" (7.62mm)
O.D.- .365" (9.27mm)

The **Quick Reset** has a knurled handle for greater comfort and better feel during picking. It also uses the adjustable collet around the feelers. As the name implies, this pick offers a quick reset feature to reset the feelers to the home position. The easy-to-adjust tensioning collet, combined with the quick reset, make this pick one of the fastest available. The barrel has a special diameter that allows the pick to work on standard diameter locks, as well as the small bore size found on some bicycle locks. Comes with the Tubular Key & Pick Decoder (No. TKPD-1) and a genuine leather case (No. TLP-CASE). (No. TLP-FL-7SB Feelers only).

Tubular locks present an excellent opportunity for another specialty in your business. Being able to pick these locks is the first step. Whether you choose a standard or specialty model HPC Tubular Pick, you can pick all 7 pins at once, saving you valuable time. That means greater profits for you.
